

The city of Salzburg - and especially its historic centre - is said to be one of the loveliest places in Europe, in 1997 it was designated a world heritage site by UNESCO. Salzburg is not only renowned for its Music Festival and for its genius loci Wolfgang Amadeus Mozart, but also for its many other interesting sights. If you're planning to visit Salzburg be sure to have enough time to take in the unique atmosphere of the city. For more detailed information about Salzburg see the website: www.salzburg.info

Welcome Message

Dear Colleagues,

The European Craniofacial Congress has a long tradition. It is an honour and pleasure for the Austrian Cleft Palate Craniofacial Association to continue this tradition and to be able to organize this conference in Salzburg in September 2011.

The conference will focus mainly on interdisciplinary co-operation, the joint effort of all specialist fields involved in the treatment of patients with cleft lip and/or palate and related craniofacial anomalies. Besides top international speakers, we would appreciate many contributions from all participating disciplines as this co-operation is so important for a successful treatment. With this in mind, we would like to encourage colleagues from all countries to take an active part in the conference and offer lectures and/or poster-presentations. Salzburg, which is well-known as a venue for conferences, will also play a part by creating the right atmosphere for our endeavours.

I would therefore like to invite you to participate in the 9th European Craniofacial Congress in September 2011, and wish you a successful time, scientifically, as well as a relaxing and interesting time in Salzburg.

Best regards

Peter Schachner, MD, DDS

President of the 9th European Craniofacial Congress
President of the Austrian Cleft Palate Craniofacial Association
Dept. of Oral & Maxillofacial Surgery
